

Double Water Trough

Reference: DT70

£182.63

We offer a variety of single and double reservoir water troughs ranging in capacity from 53L to 400L. Smaller capacity troughs are particularly suited for calves, horses, goats and sheep. Each trough is fitted with a high pressure float valve protected within a plastic/metal cover to prevent tampering by animals and subsequent damage. These troughs are strong and durable and suitable for both internal and external use. They are easy to install and maintain and can be simply loaded into/onto a vehicle for transport. The 62 gallon (282L) Double Reservoir Water Trough can be positioned between two zoned areas thereby maximising use. The trough is fitted with 1/2" high pressure float valve (10L/min) protected within a plastic compartment. Features Fitted with 1/2" high pressure brass float valve (10L p/min) Valve protected within a plastic compartment to prevent tampering by animals and subsequent damage Manufactured from frost resistant and UV protected polyethylene Tips: A concrete or hardcore standing should be laid not less than 2m wide around the trough to prevent poaching Benefits Double reservoir allows the trough to be positioned between two zoned areas thereby maximising use Provide your livestock with fresh, clean and easy accessible water drinking water Will withstand extreme climate conditions ensuring long life span Easy to transport and move around Fully adjustable & accessible valves that comply with water safety regulations Stable in UV light and easy to clean Specification Dimensions (mm) 1372 x 635 x 451 Capacity (L / gal) 282 / 62 Colour Black
