

300kg ATV Salt Spreader with Plastic Hopper and 18-9.5X8 Tyres

Reference: Q05Q

£1,411.80

300kg ATV Salt Spreader with Plastic Hopper and 18-9.5X8 Tyres We are now offering a new design 6 bag sower, with 12 product improvements. The Photo shown is now of our NEW model. This NEW model comes with a Plastic Hopper. The ground driven quad spreader has a 6 bag/300kg capacity and is ideal for spreading salt in winter months. It can be used to treat icy conditions on roads, car parks and commercial premises. By removing the deflector plate you can also use this spreader for spreading other materials such as fertiliser or grass seed, making it a very versatile machine. It can be towed behind a quad or any vehicle with a 50mm tow ball. With an adjustable drawbar height and linkage to level the drawbar this spreader is suitable to use behind any vehicle. The new model has a wider wheel base for added stability. A bigger, dished spinner gives an excellent spread. The new model comes with knobby tyres 18x9.5x8 with an option of 22x11-8 tyres. The 4 stud hubs allow for easier wheel changes. Features include Lightweight and easily towed Capacity 300kg UV Protected Hopper 18x9.5-8 knobby tyres Large Stainless steel dished spinner for corrosion resistance and excellent spread Also suitable for fertiliser and grass seed Salt Spreader is specially designed with a specific gearbox with a gearing ratio for better traction in icy conditions Range of spreader spray is adjustable from 2.5m to 8M wide Product options The 300kg salt spreader is available in kit form or assembled. The Salt Spreader comes with 18-9.5x8 tyres as standard however there are optional 22-11x8 tyres are available An optional Mesh Grill is available to break up large lumps when filling the hopper Optional Tarpaulin Cover to keep Salt / Fertiliser dry Please use drop down tabs to select your choices!
