

Heavy Duty 5ft Land Roller

Reference: BP229

£1,025.45

Heavy Duty 5ft Land Roller The 5ft heavy duty land roller is ideal for grassland. The paddock roller is water ballasted which makes it ideal for grassland work. It is fitted with a pin or 50mm standard ball hitch towing point and can be towed by tractor, ATV or 4x4. It has a 40mm towing shaft, greaseable bearings and a fully adjustable rear scraper. The roller measures 22" in diameter with 7mm plate steel drums. Rolling is used to smooth out uneven surfaces caused by grazing animals and heavy traffic which can also be used to press uprooted or heaved plants back into the soil to prevent desiccation. Flatter land makes subsequent weed control and harvesting easier. A water-filled roller has the advantage that the water may be drained out for lighter use or for transport. In frost-prone areas a water filled roller must be drained for winter storage to avoid breakage due to the expansion for water as it turns to ice. Rolling can produce a firm surface to provide a "faster" surface. Like all field practices it must be done correctly so it won't do more harm than good. DELIVERY TIME APPROXIMATELY 5 WEEKS Features include Can be pulled by tractor, ATV or 4x4 510mm barrel 7mm thickness Fitted with greasable bearings Water filled Drum Diameter is 22" using 7mm steel plate (thickness) Optional ball hitch available for the roller Specification Width Empty Weight (KG) Full Weight (KG) 4ft 170 500 5ft 200 600 6ft 252 700 8ft 304 800 Video demonstration:
